

Dear LA County Commissioners,

Our family has lived in the Malibu Canyon area for the last 5 years. We have experienced unique and, sometimes dangerous, weather patterns that require the attention and focus of local resources and political input. Map B is the best map going forward as it allows a local LA County Board of Supervisors representative to focus on the area that experiences such similar weather patterns, topography, and the challenges that come with it.

We STRONGLY urge you to push forward the proposed Map B and allow North County to have a dedicated rep that understands the community. Can focus on the community. And can bring together the best programs and resources for constituents.

Thank you.

The Teague Family
